

PhytoTrust™ Elderberry Extract

Not just Elderberry — Elderberry with prebiotic value !

PhytoTrust™ Elderberry extract with 5%-25% anthocyanins is a plant-based ingredient aimed at immune health, antioxidant nutrition, and functional food applications.

PhytoTrust™ Elderberry extract uses high-quality elderberries as the raw material, standardized to 5%-25% anthocyanins, and uses prebiotics FOS/GOS as the spray-drying carrier, making it different from traditional maltodextrin-based products.

With the combination of 'plant anthocyanins + prebiotic excipients,' this product not only provides naturally sourced anthocyanin active ingredients but also offers functional formulation benefits.

Why Choose PhytoTrust™ Elderberry Extract ?

Traditional elderberry extracts often use maltodextrin as a spray-drying carrier, mainly to improve powder forming, flow, and stability. But as consumers pay more attention to transparent formulas, low-sugar options, and functional additives, the appeal of regular maltodextrin carriers in premium products is gradually decreasing.

PhytoTrust™ Elderberry extract using FOS/GOS instead of maltodextrin as a spray-drying aid, the product has been **fully upgraded** while keeping its good powder characteristics.

Upgrade 01

From regular carriers to functional **prebiotic excipients**

Upgrade 02

From traditional spray-dried extracts to **clean label-friendly ingredients**

Upgrade 03

From a single antioxidant concept to a combined nutrition of **'immune health + gut friendliness'**

Better suited

For premium solid drinks, gummies, sachets, and dietary supplement formulations
