Section 4 First Aid Measures			
Inhalation	Move the person to fresh air. Keep at rest in a position comfortable for breathing. Seek medical advice if irritation, coughing or other symptoms persist.		
Skin contact	Wash with soap and water. Remove contaminated clothing. Seek medical advice if irritation develops or persists.		
Eye contact	Rinse cautiously with clean water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing. Obtain medical advice if irritation persists.		
Ingestion	Rinse mouth. If a large amount has been swallowed or symptoms occur, seek medical advice. Never give anything by mouth to an unconscious person.		

Section 5 Fire-Fighting Measures

5.1 Extinguishing media

Suitable media: water spray, alcohol-resistant foam, dry chemical powder or carbon dioxide, selected according to the surrounding fire. Avoid directing a high-pressure water jet at loose powder.

5.2 Special hazards arising from the substance or mixture

Thermal decomposition or combustion may produce carbon oxides, nitrogen oxides and irritating fumes. Dispersed fine dust may present a combustible-dust hazard.

5.3 Advice for firefighters

Wear self-contained breathing apparatus and full protective clothing. Cool exposed containers with water spray. Prevent contaminated firefighting water from entering drains or surface waters where practicable.

Section 6 Accidental Release Measures

6.1 Personal precautions, protective equipment and emergency procedures

Avoid breathing dust and avoid contact with eyes. Ensure adequate ventilation. Remove ignition sources and prevent dust generation. Wear suitable protective equipment as described in Section 8.

6.2 Environmental precautions

Avoid uncontrolled release to drains, surface water and soil. The product is food-grade material but bulk releases should be contained.

6.3 Methods and material for containment and cleaning up

Carefully sweep or vacuum using equipment suitable for combustible dust. Transfer to a clean, dry, labelled container. Avoid dry brushing or compressed air where this creates airborne dust. Wash the affected area after recovery.

Section 7 Handling and Storage

7.1 Precautions for safe handling

Use adequate ventilation and minimise dust generation and accumulation.

Avoid contact with eyes and prolonged skin contact. Do not breathe dust.

Keep away from heat, sparks and open flames when dust may be generated.

Observe good industrial hygiene. Wash hands after handling and before eating, drinking or smoking.

7.2 Conditions for safe storage, including any incompatibilities

Store in the original, tightly closed container in a cool, dry and well-ventilated place. Protect from moisture, contamination, direct sunlight and strong oxidising agents. Keep packaging closed when not in use.

Section 8 Exposure Controls/Personal Protection

Engineering controls	Provide local exhaust ventilation where dust is generated. Use closed transfer systems where practicable. Maintain good housekeeping to prevent dust accumulation.
Eye/face protection	Safety glasses with side shields; use chemical safety goggles where significant dust exposure is possible (e.g. EN 166).
Hand protection	Protective gloves are recommended for prolonged or repeated handling. Select glove material according to workplace risk assessment.
Skin/body protection	Clean work clothing appropriate to the level of exposure.
Respiratory protection	Where ventilation is insufficient or dust levels are elevated, use a suitable particulate respirator compliant with EN 149 (e.g. FFP2), selected by risk assessment.
Environmental exposure controls	Prevent significant uncontrolled release to the

environment.
