## INGREDIENTS

An ingredient is defined in Directive 2000/13/EC on labelling: "ingredient means any substance including additives, used in the production or preparation of a foodstuff and still present in the finished product although possibly in a modified form" i.e all raw materials to produce the goods.

Please list all ingredients:

| Ingredients/material composition | %    | Country of origin |
|----------------------------------|------|-------------------|
| Soy Extract                      | 100% | China             |
|                                  |      |                   |
|                                  |      |                   |

## Section 5 Fire-Fighting Measures

### 5.1 Extinguishing media

Suitable media: Water spray, carbon dioxide, dry chemical powder or suitable foam. Select media appropriate to the surrounding fire.

Unsuitable media: Avoid a high-pressure water jet where it could disperse accumulated powder.

### 5.2 Special hazards arising from the substance

The product is not classified as flammable. Thermal decomposition or combustion may produce carbon monoxide, carbon dioxide and nitrogen oxides. Dispersed fine dust may form a combustible dust-air mixture.

### 5.3 Advice for firefighters

Wear self-contained breathing apparatus and full protective clothing when fighting a significant fire. Prevent contaminated firefighting water from entering drains or surface water where practicable.

## Section 6 Accidental Release Measures

### 6.1 Personal precautions, protective equipment and emergency procedures

Ensure adequate ventilation. Avoid dust formation and inhalation. Wear eye protection and suitable work gloves. Use particulate respiratory protection when ventilation is insufficient or significant airborne dust is generated.

### 6.2 Environmental precautions

Prevent large quantities from entering drains, surface water or soil. Notify the relevant authority if a significant release reaches the environment.

### 6.3 Methods and material for containment and cleaning up

Collect with an industrial vacuum fitted with an appropriate particulate filter, or sweep carefully while minimising dust. Place in a labelled, closed container for recovery or disposal. After bulk collection, wipe remaining residue with a damp cloth. Do not use compressed air for cleaning.

## Section 7 Handling and Storage

### 7.1 Precautions for safe handling

Use adequate ventilation or local exhaust where dust may be generated. Avoid contact with eyes and prolonged skin contact. Avoid ingestion and inhalation of dust. Prevent dust accumulation on surfaces. Keep away from ignition sources where dust clouds may occur. Wash hands after handling and before eating, drinking or smoking.

### 7.2 Conditions for safe storage, including incompatibilities

Keep the container tightly closed in a cool, dry and well-ventilated place. Keep away from strong oxidising agents, strong acids and strong bases.

### 7.3 Specific end use

Raw material for professional manufacture. Follow the applicable product specification, food hygiene requirements and workplace risk assessment.

## Section 8 Exposure Controls/Personal Protection

### 8.1 Exposure controls

Engineering controls: Provide general ventilation and local dust extraction at transfer, weighing, milling or filling points. Avoid open handling that creates visible dust clouds.

Eye/face protection: Safety glasses with side shields or goggles conforming to EN 166 where dust exposure is possible.

Hand protection: Suitable protective gloves selected according to the workplace risk assessment. Inspect before use.

Skin/body protection: Clean work clothing. Remove and wash contaminated clothing before reuse.

Respiratory protection: Normally not required with adequate ventilation. If significant dust is generated, use an EN 149-compliant particulate respirator, such as FFP2, or equivalent, as determined by the risk assessment.

Hygiene measures: Do not eat, drink or smoke in handling areas. Wash hands and exposed skin after use.

Environmental exposure controls: Avoid uncontrolled release of large quantities to drains or the environment.

## Section 9 Physical and Chemical Properties

|                                       |                                               |
|---------------------------------------|-----------------------------------------------|
| Physical States                       | [ ] Gas [ ] Liquid [ X ] Solid                |
| Melting Point                         | No data available.                            |
| Boiling Point                         | No data available.                            |
| Autoignition Pt                       | No data available.                            |
| Flash Pt                              | No data available.                            |
| Explosive Limits                      | LEL No data available. UEL No data available. |
| Specific Gravity (Water = 1)          | No data available.                            |
| Vapor Pressure (vs. Air or mm Hg)     | No data available.                            |
| Vapor Density (vs. Air = 1)           | No data available.                            |
| Evaporation Rate (vs Butyl Acetate=1) | No data available.                            |
| Relative density                      | No data available.                            |
| Solubility in Water                   | Dissolve in water                             |
| Partition coefficient                 | No data available.                            |
| Auto-ignition temperature             | No data available.                            |
| Viscosity                             | No data available.                            |
| Decomposition temperature             | No data available.                            |
| PH                                    | No data available.                            |
| Appearance and Odor                   | Yellow powder                                 |

## Section 10 Stability and Reactivity

**10.1 Reactivity:** No hazardous reaction is expected under recommended handling and storage conditions.

**10.2 Chemical stability:** Stable under recommended storage conditions.

**10.3 Possibility of hazardous reactions:** Hazardous polymerisation is not expected.

**10.4 Conditions to avoid:** Excessive heat, moisture, contamination, dust accumulation and ignition sources where a dust cloud may form.

**10.5 Incompatible materials:** Strong oxidising agents, strong acids and strong bases.

**10.6 Hazardous decomposition products:** Carbon monoxide, carbon dioxide and nitrogen oxides may be generated by thermal decomposition or combustion.

## Section 11 Toxicological Information

| Endpoint                          | Assessment                                                                                                                      |
|-----------------------------------|---------------------------------------------------------------------------------------------------------------------------------|
| Acute toxicity                    | No adequate product-specific data are available. No basis for classification has been identified from the information reviewed. |
| Skin corrosion/irritation         | Not classified based on available information. Dust may cause temporary mechanical irritation.                                  |
| Serious eye damage/irritation     | Not classified based on available information. Dust may cause temporary mechanical irritation.                                  |
| Respiratory or skin sensitisation | No adequate product-specific data are available.                                                                                |
| Germ cell mutagenicity            | No adequate product-specific data are available. No basis for classification has been identified.                               |
| Carcinogenicity                   | No adequate product-specific data are available. No basis for classification has been identified.                               |

|                              |                                                                                                                                      |
|------------------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| Reproductive toxicity        | No adequate product-specific data are available. No basis for classification has been identified.                                    |
| STOT - single exposure       | Not classified based on available information. Airborne dust may cause transient respiratory irritation.                             |
| STOT - repeated exposure     | No adequate product-specific data are available.                                                                                     |
| Aspiration hazard            | Not applicable to the product in solid form.                                                                                         |
| Likely routes of exposure    | Inhalation of dust, eye contact, skin contact and ingestion.                                                                         |
| Symptoms and delayed effects | Dust may cause temporary mechanical irritation. No adequate product-specific information on delayed or chronic effects is available. |

## Section 12 Ecological Information

|                               |                                                                                                                                   |
|-------------------------------|-----------------------------------------------------------------------------------------------------------------------------------|
| Toxicity                      | No adequate product-specific aquatic toxicity data are available.                                                                 |
| Persistence and degradability | No adequate product-specific biodegradation data are available.                                                                   |
| Bioaccumulative potential     | Significant bioaccumulation is not expected based on water solubility, but no product-specific study has been supplied.           |
| Mobility in soil              | The substance is water soluble and may be mobile in aqueous environments. No product-specific soil adsorption data are available. |

## Section 13 Disposal Considerations

### 13.1 Waste treatment methods

Product waste: Recover or recycle where practicable. Otherwise dispose of through an authorised waste contractor in accordance with applicable national and local requirements. Do not discharge bulk material to drains.

Contaminated packaging: Empty completely. Recycle or dispose of according to local requirements. Do not reuse contaminated packaging for food or feed.

## Section 14 Transport Information

| Transport mode      | Classification                   |
|---------------------|----------------------------------|
| ADR/RID (road/rail) | Not regulated as dangerous goods |
| IMDG (sea)          | Not regulated as dangerous goods |
| IATA/ICAO (air)     | Not regulated as dangerous goods |

## Section 15 Regulatory Information

This SDS has been prepared with reference to Regulation (EC) No 1907/2006 (REACH), as amended, including the SDS requirements introduced by Regulation (EU) 2020/878, and Regulation (EC) No 1272/2008 (CLP), as amended.

## Section 16 Other Information

This SDS is issued based on the latest official test data and industry standard specifications for Soy Extract All contents are for safety guidance only.
